

Cedric Martin Mendoza

Web/Mobile Developer

About Me

I am a self-taught developer with 1 year of experience programming for web and some mobile apps on the side.

I have a good grasp of web technologies specifically Javascript, HTML and CSS. I've mainly focused on ReactJS framework for my apps and is working on integrating some back end to existing apps. Skills I'm working on right now is React Native, creating my own assets, SQL, PHP, Design in general and back end languages, working my way to develop full stack apps.

I hope that you will consider having me on your company and I'd be proud to show you that I'm passionate on learning and doing my best on this field.

Projects

ReactJS Projects

- **Paste Notes Chrome Extension**
<https://github.com/cedricmendoza02/paste-notes-chrome-extension>
My best project so far. Technologies used are ReactJS and TailwindCSS for frontend, Chrome APIs for service worker and content scripts, Webpack as bundler and Git SCM for managing the code base. Status is in Work in Progress but almost ready for release.
- **Pomodoro Clock**
https://github.com/cedricmendoza02/pomodoro-clock/tree/pomodoro_clock/src
Second best project I've created in terms of service. I created this app to help with my focused study session. Technologies used are ReactJS and Vanilla CSS and Git for managing the code.

Education

- 2019 - Bachelor's Degree Undergrad - Information Technology
- FreeCodeCamp - Responsive Design
<https://freecodecamp.org/certification/cedricmendoza02/responsive-web-design>
- FreeCodeCamp - Javascript Algo and Structures
<https://www.freecodecamp.org/certification/javascript-algorithms-and-data-structures>
- FreeCodeCamp - Frontend Libraries
<https://www.freecodecamp.org/certification/cedricmendoza02/frontend-development-libraries>
- Other Learning sources like Youtube, LinkedInLearning and FreeCodeCamp

Work Experience

CBRE GWS

IT Helpdesk Analyst - 2020 to Present

- Mac/Windows Troubleshooting
- Active Directory Management

Data Visualization

Some of the projects I'm working on with Freecodecamp

- **D3js heatmap**
