

Cedric Martin Mendoza

Web Developer

Highly motivated and passionate on learning, I've taught myself how to develop web apps for over a year now. I have working knowledge of the MERN stack and is working on other technologies such as mobile apps while incessantly developing my skills on existing ones. I assure you that if you hire me, I'll be one of your best hires yet.

Projects

Paste Notes - Chrome Extension

Status: Published

Stack used: ReactJS, TailwindCSS, Webpack, Chrome API

Link: chrome.google.com/webstore/detail/paste-notes/fahjckjmikeeekgjpcfohnkgpfdemeii

This app is what inspired me to start my web development journey. I needed a way to automate my current job and this is what I came up with. This allows a user to paste pre-defined notes from the context menu to any input fields.

Built with ReactJS, TailwindCSS, Webpack and Chrome API. This has also introduced me to some backend concepts due to how the Chrome API works. The front end script that's injected to the page communicates to the back end through a message passing API.

Pomodoro Clock - Android App

Status: WIP

Stack used: ReactNative, Java, Kotlin

Link: github.com/cedricmendoza02/rn-pomodoro-clock

I needed an app to help me focus and know when to end a study session on a certain topic. This is the app I came up with. It's in currently working state but still pending on getting published. Not much going on here but I plan on releasing full stack mobile apps in the future.

Courses & Trainings

Follow me on LinkedIn to check out my learnings and other courses I've taken related to development

LinkedIn Learning | React: Creating and Hosting a Full-Stack Site

Instructor: Shaun Wassell

Skills Covered: Full Stack Development, ReactJS, Node, Axios, Firebase Auth, GCP Hosting

<https://www.linkedin.com/learning/certificates/37739b4bb8a7ae8d8fc9c346f59add17d2a0120c3a26550fd695db4cdd6db702?u=1007594>

LinkedIn Learning | React.js: Building an Interface

Instructor: Ray Villalobos

Skills Covered: ReactJS, TailwindCSS, Web Interface Design
